DATE MAILED:

Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

The notice of allowance was mailed on August 8, 2007. However, upon further review, minor errors not related to patentability were determined in the drawings and specification as follows:

- 1) paragraph [0022] lists Figures 1, 2, and 3, but only 2 drawings are present; and
- 2) both of the drawings lack figure labels

the examiner has attempted to resolve these issues as follows:

for issue 2), the examiner has labelled the top drawing as "Fig. 2" and the bottom drawing as "Fig. 1" -- the applicant is requested to file new formal drawings in response to the examiner's additions (which were made in pen);

for issue 1), the examiner has amended [0022] by deleting (by strikethrough) the last sentence of paragraph [0022], "Fig. 3 is a top view of a variant of the injection device.";

in paragraph [0023], 9th and 10th lines, the text "In the embodiment of figure 3, the fluid passages 6 are arranged substantially parallel to the interface between the first and second bodies (2,3)." has been deleted (by strikethrough); and

in paragraph [0023], 11th line, "Figs. 1 to 3" has been replaced with --Figs. 1 and 2--.

If these changes are not completely satisfactory to the applicants, then applicants are suggested to file a 312 amendment addressing the specification and/or drawings for further consideration by the examiner. The examiner (different than the examiner who issued this application) can be reached at (571) 272-1178 if any questions or problems arise.
